National Industries an ISO 9001:2008 certified companies are established in the year 1992. We have earned strong market goodwill as a trustworthy manufacturer and suppliers of cable tray systems. Under This Product Category , We offer Perforated Cable Trays , Ladder Type Cable Trays, Raceway and Swaged Type Tubular Poles and more. Our Quick to install cable tray system are widely used in offshore Environment , Railways, Tunnels, Chemicals Industries and many more. These System Support to all types of wires that makes them the perfect solutions for commercial and industrial construction operations. The Offered cable tray system is made from fire proof materials for protecting the cable from high temperature level and harmful flames.

Machinery

Our manufacturing infrastructure is well equipped with state of the art machinery like Shearing Machines, CNC Bending Machine, CNC Punching Machine, Power Brakes, Press Brakes and Painting Booth. CAD/ CAM is an integral process of our manufacturing.

R & D facility

We have a separate department for R & D , which helps us to keep one step ahead of completion and to mark a distinction icon this ever evolving industry. We work meticulously to ensure that only the best quality products are manufactured in our company for which R&D is an important tool in our hands to attain greater client satisfaction.

Customer Satisfaction

We strive to achieve the client highly satisfied by presenting the excellent quality and on-time delivery through continual improvements in our various chemicals. We have facilities for checking the quality properties of the base materials utilized in the preparation process. In addition to this, our quality inspector assures that our products have the quality standard.

Our Infrastructure

We have a sophisticated manufacturing facility, where all activities are performed in a streamlined manner and we are ably meeting the targets set by a firm successfully. Moreover, this also facilitates quality checking of our range of industrial, to make sure that these meet the industry quality standards. To assure that all the processes run fluently and smoothly, we have divided our spacious infrastructure into departments such as manufacturing, logistics, quality control.

Quality Assurance

Combining advanced techniques with best production management, we are providing a quality assured array of products. We assure that these items are innovative and meet universal quality standards. In sync with the set industry standards, we make use of superior quality basic material for processing these products which we procure from certified vendors of the industry. Further, our provided products are highly appreciated in the market for their robust construction, easy installation, precise design, and rust resistance

Perforated Type Cable Tray

We are an astounding element, occupied with assembling and providing a fantastic scope of Perforated Cable Tray. The offered link plate are recognized among clients for its less support and strong structure. This link plate is created by our talented experts by utilizing high-grade material and driving innovation as per the set standards industry. We offer these link plate on various determinations according to the interest of clients.

Product Details:

Thickness	From 1.2 mm to 3 mm
Accessories	Vertical Elbows, Horizontal Bends, Adjustable Bends, Crosses, Tees and Reducers, Coupler plates Etc.
Raw Material	Mild Steel / Aluminum/ Stainless Steels/ Galvanized Sheet.
Strength	Light, Medium & Heavy Duty
Width	From 50 mm to 1200 mm

Ladder Type Cable Tray

As perforated trays, Ladder Type Cable Tray additionally are manufactured from MS sheets with various completing and Pre Galvanized sheets for direct and quick establishment. The best preferred standpoint of stepping stool type link plate is that dampness can't amass on them.

Product Details:

Finish	Self-Finish, Pre-Galvanized, Hot Dip Galvanized Painted/Epoxy Coated/Anodized/ Powder Coated/Electro
Accessories	Vertical Elbows, Horizontal Bends, Adjustable Bends, Crosses, Tees and Reducers, Coupler plates Etc.
Rung Height	From 10 mm to 20 mm
Strength	Light, Medium & Heavy Duty
Width	From 50 mm to 1200 mm

Raceway / Cable Duct / Trunking

Our raceways offer perfect solutions for networking wiring management systems. Contemporarily designed and affordable, the raceways are functional for wire enclosure application in commercial, industrial and residential environments. These raceways are installed in school, hospitals (laboratories , MRI , OR,ER) offices, warehouses etc. because they maximize system performance while optimizing costs.

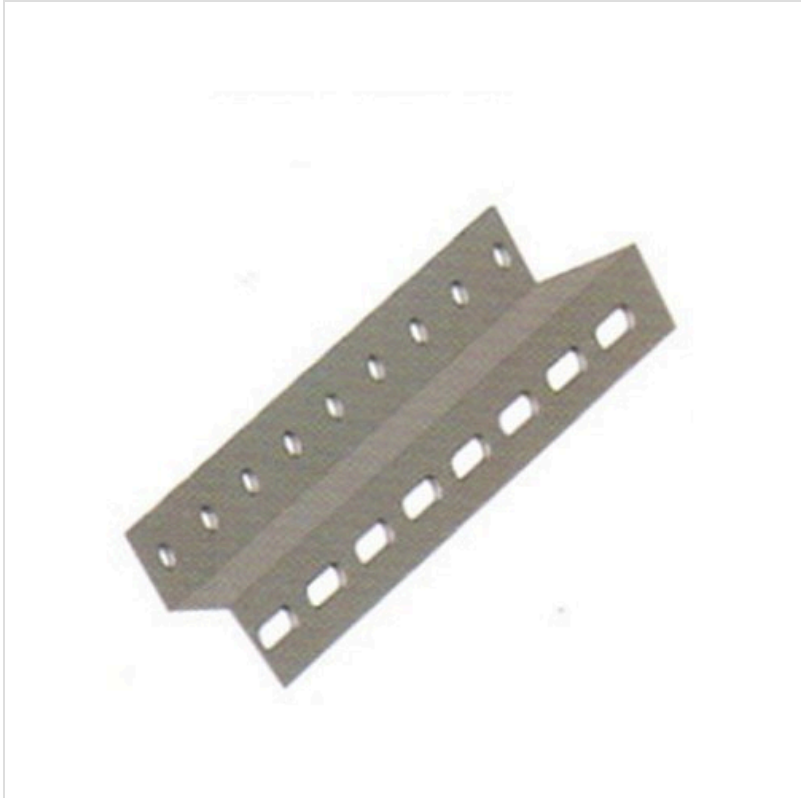

Product Details:

Thickness	From 1.2 mm to 3 mm
Length	From 2500mm / 3000mm
Finish	Self-Finish, Pre-Galvanized, Hot Dip Galvanized Painted/Epoxy Coated/Anodized/ Powder Coated/Electro
Raw Material	Mild Steel / Aluminum/ Stainless Steels/ Galvanized Sheet.
Accessories	Vertical Elbows, Horizontal Bends, Adjustable Bends, Crosses, Tees and Reducers, Coupler plates Etc.

Swaged Types Steels Tubular Pole

We are one of the main maker and provider of a wide scope of Swaged Types Steels Tubular Pole. These shafts have discovered their application in zones like media transmission utility and sports lighting purposes. Our posts are accessible in different standard sizes, determinations and measurements and furthermore according to the requests of customers.

Z-Channel

With the focus on the ever-evolving demands of our clients, we have come up with a wide array of uniquely designed Z Channel from Jaipur, Rajasthan. Under the supervision of our talented employees, this channel is processed using supreme grade base material and cutting-edge techniques in accordance with set industry standards. In order to assure its quality, the offered channel is duly examined on various parameters of quality by our quality professionals.

Specification:

- Sturdiness
- Easy installation
- Anti-corrosive

C-Channel

We provide the high-level latest technology for manufacturing C-Channel from Jaipur, Rajasthan. These C-Channels are designed to meet the required manufacturing activities and special needs of the customer on personal advice, apart from design and developed applications, a uniform quality, very light, uniform, and finishing on the right surface. These channels are utilized in Electrical and Electronics Industries in control panels. Their superior mechanical strength & high insulation resistance also helps it to deliver premium performance.

Coupler Plates/Jointer

We are the optimum choice of the market and provide a premium quality range of Coupler Plates/Jointer which is devised using quality raw material and innovative technology from Jaipur, Rajasthan. We understand the market need and offer advanced items for long sustainability and high performance. These are famous for their high tensile strength, rust free features, and nominal price range.

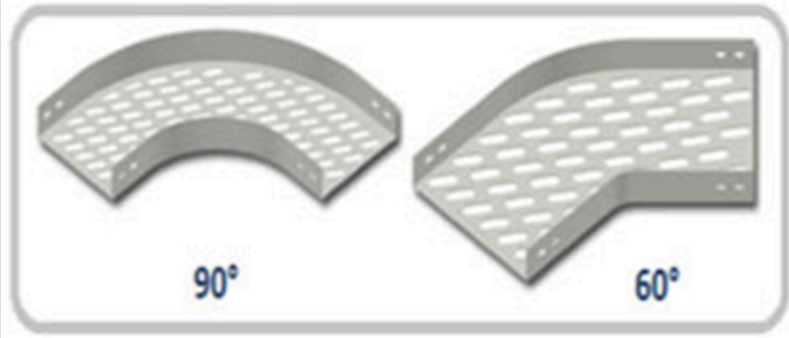

Features:

- Well devised
- Highly reliable
- Accurate and sustainable

C-Clamp

We have been counted amongst the most reputed names in this business, engaged in offering a premium quality range of C-Clamp from Jaipur, Rajasthan. This C-Clamp is available in various sizes and dimensions according to the customer's requirements. Our product array is known for its sturdy construction and best design.

Horizontal Bends

We offer Horizontal Bends that is made using superior quality of base materials from Jaipur, Rajasthan. The whole array is fabricated as per the national and international standards of quality measures. All these Horizontal Bends are not only durable and precise but also as per the technical details furnished by the customers. These Horizontal Bends are utilized for various applications, and these all are easy to use and also cost-effective.

Cross (Equal & Unequal)

We are manufacturer and supplier of Cross (Equal & Unequal) from Jaipur, Rajasthan. We are providing these products in variegated shapes and sizes to cater to the specific needs of our customers. The high standards of these products are global standards base, which produces a high degree of satisfaction among the customers. These Cross (Equal & Unequal) are extensively utilized in fabrication, construction and machining applications.

Features:

- Corrosion & abrasion resistance
- High tensile strength
- Long life

Reducers

Reducers is a tube fitting that is used in many industries to present the largest connection flexibility in connecting fractional tubes in many establishments from Jaipur, Rajasthan. Reducers is also used in joins two pipes of diverse diameter. Our offered reducers are available in an array of materials depending on the end use of the items and these fittings are fabricating in inch and metric size.

Tees (Equal & Unequal)

We are involved in the manufacturing and supplying Tees (Equal & Unequal). Flawlessly engineered to perfection using advanced machines and technology, these Tees (Equal & Unequal) are highly used in a multitude of industries around the world. Long lasting in quality, these Tees (Equal & Unequal) are available at reasonable prices.

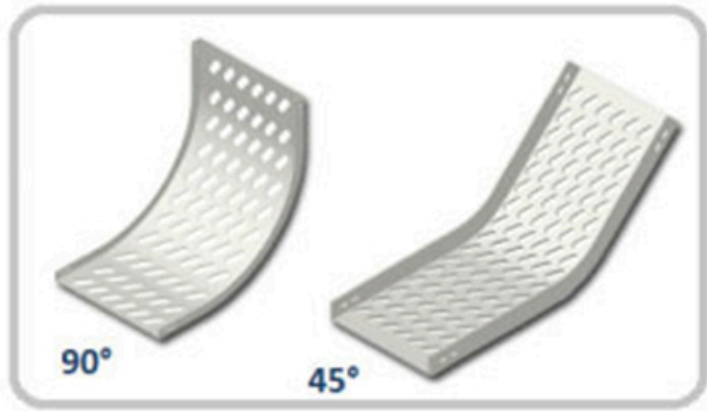

Vertical Risers (Inside)

We offer our customers a wide variety of excellent quality Vertical Risers (Inside) that is designed with the premium base materials as per the strict quality norms from Jaipur, Rajasthan. Our offered array is available in several dimensions to suit the requisites of the customers. Vertical Risers (Inside) offered by us which is in huge demands in the national and international markets for high durability, performance, and affordable cost.

Features:

- Durability
- Reliability
- High Quality
- Cost-effectiveness

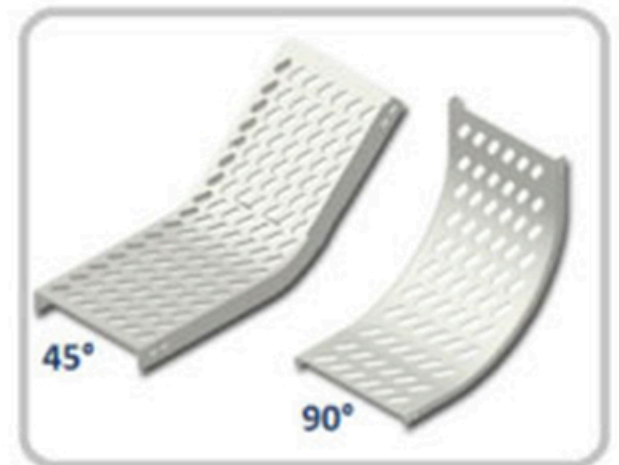

Vertical Risers (Outside)

Owing to our in-depth knowledge in this business, we are engrossed in offering an extensive assortment of Vertical Risers (Outside) from Jaipur, Rajasthan. At our advanced production unit, the provided items are developed by utilizing premium quality basic materials which are procured from the certified vendors of the market. Furthermore, we deliver these items at customers' end within the promised time frame at economical rates.

Features:

- Superior weight bearing capacity
- Longer functional life

Raceway With Cover

A raceway with cover is a protective enclosure used to route and organize electrical wiring in residential, commercial, and industrial installations. Made from durable materials such as PVC, steel, or aluminum, it safeguards cables from physical damage, dust, and moisture. The cover securely snaps or screws onto the raceway base, providing easy access for maintenance and future wiring modifications. Raceway systems help maintain a neat and professional appearance, often used in visible areas like offices or workshops. They support compliance with electrical safety codes and simplify cable management by keeping conductors separated, labeled, and protected within a defined path.

Product Details:

Minimum Order Quantity	1
------------------------	---

Floor Junction Box For Raceway

The Floor Junction Box for Raceway is a robust and versatile solution designed to facilitate the safe and organized distribution of electrical and communication cabling within floor-level raceway systems. Engineered for use in commercial, industrial, and institutional environments, this junction box provides a reliable enclosure for wire splicing, transitions, and terminations.

Constructed from high-quality galvanized iron (GI), stainless steel, or powder-coated mild steel, the box is built to withstand mechanical stress and environmental factors commonly found in floor installations. Its flush-mounted design ensures a neat finish, minimizing trip hazards and allowing seamless integration with various flooring materials.

Equipped with multiple knockouts for flexible conduit and raceway entry, the box supports quick and efficient cable routing. The removable or screw-fixed lid allows easy access for maintenance, while optional IP-rated sealing offers protection against dust and moisture ingress.
